

# HUGE HALIFAX LEDGE OPENED ON BUCKEYE GROUND

## North Crosscut on 1200 Level Cuts the Vein Opened on Halifax 1000

### Indiana Tourists Due at 5 P.M. Escorted by Tonopah Hosts Mine Whistles Will Blow

The weather man did not do the right thing by Tonopah today but the showers that spread over the desert were heavy enough to lay the dust and to destroy impressions of visitors that it never rains in this part of the state. If the moisture had held off a few hours all would have been well but it came down after midnight and then renewed its weeping about noon. Observer Percy says there will be a clearing this afternoon and he does not expect anything to mar the reception to the auto tourists from Indiana.

However, the rain prevented a larger turnout of the Tonopah motorists for the trip to Hot Creek and put a damper on the ladies who were going to run out to Stone Cabin later in the day. Advice from along the road state that everything is progressing favorably and that the people of Tonopah will be expected to turn out when they hear the sirens of the mining companies proclaim the fact that the cars are within sight of the camp.

The Tonopah brass band and the Auto club will do the rest at the Elks club where a substantial lunch will be served before the travelers are sent on their way to Bishop. A delegation from Tonopah will accompany the Indiana men to Goldfield.

A delegation from Hot Creek left this morning and will set the pace.

### WARSHIP SAILS ON RUSH ORDER TO SAVE LIVES

LOUISIANA LEAVES VERA CRUZ TO PROTECT AMERICANS IN DANGER.

(By Associated Press.)

WASHINGTON, July 22.—The battleship Louisiana, which sailed from Vera Cruz on rush orders arrived at Tuspan to protect American lives endangered by fighting between federal and revolutionists.

COMPLIMENTARY TO PEOPLE OF SOUTHERN NEVADA

News that the Indiana manufacturers' tour party has again announced a change of itinerary that will take in Tonopah and Goldfield is of considerable interest to the people of Ely and an effort should be made here to get some of the party to go west through Eureka, Austin, Fallon, Reno and other places on the route that has been so widely advertised, and along which the people have for weeks been making preparations to receive the visiting tourists. That a change was decided upon after the tourists had covered part of the trip is due to the spirit of enterprise that has always pervaded the southern Nevada mining towns and they deserve great credit for being able to accomplish so much, and there is no doubt but what the Indiana tourists will be royally entertained and thoroughly enjoy their visit to Tonopah and Goldfield.—Ely Examiner.

### The Holy Synod Burns Tolstoi

By Associated Press.  
ST. PETERSBURG, July 22.—Emperor Nicholas has approved the decision of the Holy Synod to destroy the three posthumous works of Tolstoi because of the unorthodox comments on the old testament.

coming in this afternoon. Among those who went out were H. T. Robinson of the Tonopah Garage and Auto Supply company, Eugene Bertram, William Campbell of Campbell & Kelly and Jules Smith. The latter took out sandwiches and refreshments. Alex Dewar went out to see that everybody was satisfied. Another delegation went out later in the day intending to make connections at Stone Cabin.

The Indiana Automobile Tour will arrive in Tonopah this afternoon about five o'clock. They left Ely this morning at 4:30.

The mine whistles will announce the arrival of the first of the party and Tonopah should be on hand to welcome the visitors. The band will be out to enliven the occasion. The party will be escorted to the Elks hall where a luncheon will be served by Alex Dewar and a corp of assistants.

The tables have been set lengthwise of the banquet room and there will be no trouble in serving the visitors quickly. Dewar provided for a thousand persons at the Elks annual ball and did not hear a single complaint.

Telegrams received from the Tonopah escorts and the members of the tour say the roads through Nevada are in fine shape and the motorists are enthusiastic over them.

R. J. Highland who went out to meet the Hoosiers at Ely wired from there this morning.

"Leaving at four thirty a. m. to pilot tour to Hot Creek. Have everything ready including band at Tonopah at 5 p. m. Sure this is a fine bunch and we must show them we are on the map."

Another telegram from W. McK. White to Ed Malley says:

"Ely, Nev., July 21, 11. Ed Malley, Tonopah, Nevada. Hoosier automobiles have crossed the great Salt Lake desert to this city. Camped last night at Kearney's ranch. Everybody happy, cars are doing well. Three extra Marions among escorts running just as steadily as Marion 7 and 8. All five cars checked in every control together. Indiana tour most interesting affair in Nevada at present, overshadowing

### STRANDED ON DESERT BY A BROKEN AXLE

### WARDLE PARTY FAIL TO MAKE HOT SPRINGS WITHOUT A LONG HIKE.

Yesterday morning Austin and Emma Wardle started for Darragh's Hot Springs to bring in Mr. and Mrs. Roy Crump and Miss Leslie Wardle. Three miles this side of the Springs they broke a rear axle on their machine and had to walk to the Springs and send to town for a new axle.

Roy Crump returned to town last evening, leaving Mrs. Crump and the rest of the party to return today after the machine is repaired.

This morning Ralph Wardle sent Leon Fowler out on his motorcycle with a new axle. Mr. Wardle expects the party to reach here this evening.

### OPENS TONOPAH OFFICE ON UPPER MAIN ST.

W. F. Rendahl, who has been one of the most active real estate men in Goldfield, has opened an office at 146 Main street where he will make a specialty of selling houses for removal from the southern camp. He has many bargains in different lots of merchandise and is now offering a large line of safes.

Proof of labor blanks for sale at the Bonanza.

events of national importance. Good Roads association here wonderfully enthusiastic. Governor Oddie met the party personally and presides at big meeting tonight."

This telegram shows that the great copper camp is not slow to appreciate the importance to this state of the tour.

### Built the First Auto.

When the Indiana-to-Pacific touring party arrives you will have the chance of seeing the man who invented and built the first gasoline American car.

Elwood Haynes is one of America's really great inventors. His name ranks with that of Edison, Morse, Bell, and Fulton. Not only did his invention give to mankind the automobile which annihilates space and time and yields recreation to increasing thousands, but has been the direct inspiration of the good roads movements, which is resulting in untold good the country wide.

Less than 20 years ago Haynes was called a dreamer and mentally unbalanced by the people of Kokomo where his first car was built.

These criticisms changed to those of displeasure after the first car was built, at the noise and clutter caused by the new-fangled "horseless carriage."

### DIVIDING FUNDS LEFT OVER FROM THE FOURTH

### PART OF THE BALANCE GOES TO CHARITY AND THE REST TO AUTO ENTERTAINMENT.

The financial committee of the Fourth of July celebration have closed the account of the money left from the Fourth of July fund. Every one who donated to the cause originally was interviewed and his requests for the distribution of the surplus was carried out. A list of those who wished their money used by the automobile club to entertain the visitors from Indiana may be secured from the committee. The total amount subscribed to this cause was \$258.50. Those who desired their money to go to the Relief Corps amounted to \$46.60, a list of whom may be secured from the committee. About a dozen people could not be reached either by phone or personally and their money was returned by check. Total amount returned, \$36.

### CLAIMS 300 OZS. ROCK IN MINE AT SILVERFIELD

### SALT LAKE MEN PROPOSE TO GO AHEAD WITH RAPID DE- VELOPMENT WORK.

George Holmberg went to Millers this morning on his way to Silverfield, the new silver camp eight miles from Millers. Holmberg is associated with Van Spaulding and W. D. Livingston of Salt Lake.

A hoist and other machinery has been shipped out from Millers and will be installed at once. The company is busy building bunk houses, boarding house and office.

The shaft on the Holmberg property has been sunk over 200 feet on the vein. Assays taken a couple of weeks ago from the vein matter showed great silver values, the lowest running over 300 ounces.

Holmberg says they are going to make a camp.

## 3 YEARS' CONSCIENTIOUS WORK REWARDED ANOTHER BIG SHIPPER IS IN SIGHT FOR THE EAST SIDE OF THE DISTRICT

The Tonopah Buckeye has opened a ledge of quartz that is undoubtedly an extension of the ledge struck on the Halifax last month. The size of the find is not known, but it promises to rank with some of the largest ledges in the district. Assays run all the way down from \$2.50 to \$12 and it is supposed that when the crosscut delves into the vein values will improve to a shipping grade that will add one more shipper to the district.

The ledge was opened on the Buckeye from the 1200 foot level and Superintendent Letson Balliet says there is no doubt of it being the same ore body found on the Halifax on the 1000 foot level that has been described as one of the mammoth veins of Tonopah and from which the company began shipping two weeks ago after entering the formation. Superintendent Balliet says unless the unexpected happens, he will be shipping about the middle of August.

Thirty feet east of the shaft in the north crosscut the men ran into this ore body and is likely to be caught again on the south crosscut as the Buckeye is working in both directions. The crosscuts are run at a slight angle so they both turn east toward this ledge. In the south crosscut the formation is the same as in the north crosscut and it is believed that the ledge will be entered on that side before long, exposing 600 feet and still leaving 1200 feet on the southern holdings of the Buckeye. In the north crosscut the ledge was found dipping east and west and trending south. The Buckeye has been pushing development on the 1200 foot level since March and the north crosscut is out 275 feet from the shaft while south of the shaft there has been an advance of 300 feet.

The Buckeye is one of the best known properties in the district and the management has always been characterized by the utmost conservatism and energy. When almost every other prospect in the camp suspended work the Buckeye went ahead, the stockholders in Ohio showing implicit confidence in the management and feeling apparently safe in getting results from persistent development. During the past year, it is estimated that at least \$65,000 has been sunk in the mine. A double compartment shaft has been sent down to 1200 feet and a 32 foot sump sunk below that. The surface equipment is one of the best in Tonopah, an 80 horse power electric hoist serving to handle the ore and waste. With its present facilities the company can raise 1½ tons every five minutes and all that is required to do after getting ore is to install a ship which rests on the platform of the engine house ready for business.

### LONG RANGE LAW ENTAILS TRIP OF 200 MILES

### DISTRICT ATTORNEY GOES AL- MOST LENGTH OF COUNTY ON LARCENY CASE.

District Attorney Sanders returned home last evening from a long and arduous trip past Willow Springs almost to the eastern extremity of the county where he went to investigate a complaint of burglary preferred against a couple of young men employed on the ranches in that vicinity. The journey involved 250 miles travel but it will save the county from an expensive prosecution involving half a dozen witnesses with mileage for that distance.

It appears according to the complaint lodged by W. J. Evans that a dugout in Troy gulch was entered by Grant Welsh and Emery Garrett and some goods stolen from the place. This led to the complaint. The district attorney says it is possible, after consideration, that he will not prosecute Garrett, who is only a boy and that the other complaint will be modified to a misdemeanor. This will save an expensive trial.

### JUNK MAN BLOWS HIMSELF WHILE STOPPING HERE

### RENO BUYER SAID TO HAVE CUT LOOSE INSTEAD OF ATTEND- ING TO BUSINESS.

Harry Minkoff, a junk buyer, is wanted in Reno for appropriating several hundred dollars belonging to the Western Junk company. At least this is the allegation in a warrant issued recently. It was supposed that the accused was in Tonopah and word was sent here to apprehend him but the officers found he had left supposedly for California.

J. Giant of the junk company said he sent Minkoff to Tonopah with \$100 to buy old copper and soon began receiving telegrams asking for more money on the grounds that he had spent the original amount in buying copper. The shipments failed to come to hand and then Giant called on the authorities to act.

### HAYDEN RESIGNS HIS JOB

### CONCLUDES HE BETTER NOT TACKLE THE CAMINETTI JOB AND QUILTS.

(By Associated Press.)

WASHINGTON, July 22.—Thomas E. Hayden, associate council for the government in the Digs-Caminetti prosecution tendered his resignation today, owing to recent protests because of his inexperience as a criminal lawyer.

Hayden said the real reason was because he was obliged to be away from California during a good part of the trial.

No successor has been named and Attorneys Sullivan and Roche will prosecute.

Hayden had been considered to succeed McNah, but the attorney general said today the appointment was still open.

WASHINGTON, July 22.—In an effort to force the house democrats to allow republicans to discuss the Digs-Caminetti case Republican Leader Mann began a filibuster against all business. He caused a delay of an hour in the approval of the journal of the Friday meeting.

### TURKISH TROOPS CROSS BORDERS INTO INDIA

### REJOICING BY OTTOMANS OVER FAILURE OF BRITISH LAND GRAB.

(By Associated Press.)

CALCUTTA, July 22.—The advance of Turkish troops across the new frontier at Enos to Midia which was arranged between Turkey and Bulgaria after the recent war was received with rejoicing by the Mohammedans of India. Papers here assert that Great Britain's attempts to coerce Turkey to abandon the project to recover the territory were the cause of a dangerous Mohammedan agitation.

### TEMPERATURE REPORT.

Highest temperature yesterday, 76; a year ago, 84.  
Lowest temperature last night, 57; a year ago, 55.

### PULLMAN YIELDS GRACEFULLY BY PAYING ITS TAXES

### END OF A TWO YEARS' CONTEST SETTLED WITHOUT WAIT- ING FOR THE COURTS.

(By Associated Press.)

District Attorney Sanders has been notified by the Pullman company that it will pay all taxes accrued against that corporation and hereafter pay like any ordinary citizen of Nye county. This change of heart comes as a surprise to everybody as it was stated that the case would be fought to the last ditch.

The amount involved for last year is \$282.09, but this year the amount will be greater owing to the operation of a through car to Goldfield. Last year this car only ran to Rhyolite and therefore did not gather the mileage which is represented this year by the improved service. The number of miles operated now is from the Esmeralda county line on the T. & G. from the north and south into Tonopah, 17-10 miles, Bullfrog and Goldfield 60 miles and the Tonopah & Tidewater from Rhyolite south to the California line, a distance of 27-10 miles.

The settlement was effected recently at a conference between Chas. L. Slavin, representing Sheriff Malley, L. A. Blakeslee, state agent for the Pullman company, District Attorney Sanders and Sheriff Ingalls of Esmeralda county.

Last summer when the assessor threatened to tie up a Pullman car at the Tonopah station he was restrained by an injunction from the United States court. By the settlement the company pays all costs and the county will be enriched to the extent of nearly \$600.

Other counties interested in the settlement are Esmeralda, Elko and Mineral.

### KNIGHTS OF PYTHIAS.

Next Monday night the Knights of Pythias will install officers. Last night had been chosen but owing to the absence of several officers it was necessary to postpone the impressive initiation.

### AMERICANS ARE SAFE.

(By Associated Press.)

WASHINGTON, July 22.—All American missionaries at Sofia, Bulgaria, are safe, as reported today in a message to the state department from the American legations in these places.

### CONVICTS BURNED ALIVE

### THIRTY NEGRO PRISONERS IN- CINERATED IN SIGHT OF HELPLESS SPECTATORS.

(By Associated Press.)

JACKSON, Miss., July 22.—Thirty-five negro prisoners were burned to death last night at Oakley, a convict farm. Employees in the cotton fields during the days they were locked on the second floor of an old convict cage at night.

Flames destroyed the only stairway. The prisoners were unable to break the heavy bars on the windows and flames prevented assistance.

### TWO SHIFTS FOR WINGFIELD MINE AT WILLOW

### GETTING READY TO TEAR DOWN THE MOUNTAIN AND MAKE ANOTHER PRODUCER.

Dan Cronin, superintendent of the Wingfield property at Willow Creek, has got through with preliminary work and is now going to tackle development with two shifts enabling him to make rapid progress night and day. At present he is employing eleven men and this number will be doubled.

At the gold camp on Willow Creek they are getting immense assays but most of the ground has been located by ranchers who do not know how to develop them and therefore they are letting their claims remain idle waiting for a buyer to turn up.

### Japan Protests Against Mexico

By Associated Press.

MEXICO CITY, July 22.—Japan through its charge d'affaires here suggested to the Huerta government that there would be no sanction of demonstration in behalf of the Japanese minister which could be construed as anti-American in sentiment.
